CONTENTS

The Proceedings of the Sixth International Working Seminar on Production Economics, Part I

Preface
R.W. Grubbström (Linköping, Sweden) and H.H. Hinterhuber (Innsbruck, Austria) 1
Evaluating flexibility of alternative FMS designs – A comparative measure
L. Abdel-Malek and C. Wolf (Newark, NJ, USA) 3
Identifying the firm's characteristics affecting the choice of inventory valuation methods
F.J. Arcelus and B.A. Trenholm (Fredericton, NB, Canada) 11
Bicriteria scheduling problem involving total tardiness and total earliness penalties
M. Azizoğlu, S. Kondakci and Ö. Kirca (Ankara, Turkey) 17
Decision criteria in capital budgeting under uncertainties: implications for future research
C. Chansa-ngavej (Bangkok, Thailand) and C.A. Mount-Campbell (Columbus, OH, USA) 25
Costs and benefits of investment in electronic design
B. Chiplin, C. O'Brien and S.J. Smith (Nottingham, UK) 37
Measurable economic consequences of investments in flexible capacity
M. Corbey (Eindhoven, The Netherlands) 47
Due-date setting and production control
N.P. Dellaert (Rotterdam, The Netherlands) 59
A DSS for capacity planning of aircraft maintenance personnel
M.C. Dijkstra, L.G. Kroon, J.A.E.E. van Nunen and M. Salomon (Rotterdam, The Netherlands) 69
On the optimization of initial order quantities
H. Ding and R.W. Grubbström (Linköping, Sweden) 79
A hierarchically structured decision-support-system for demand-oriented shift planning
J. Faißt, Ch. Schneeweiß and F. Wolf (Mannheim, Germany) 89
Some designing principles of production systems based on field research in Europe and Japan
K.D. Fröhner (Hamburg, Germany) 99
On optimal strategies in inventory systems with Wiener demand process
H.-J. Girlich and V. Barche (Leipzig, Germany) 105
Lot sizing and throughput times in a job shop
H. Häfner (Mannheim, Germany) 111
Generic bill-of-material: a new product model
H.M.H. Hegge and J.C. Wortmann (Eindhoven, The Netherlands) 117
Optimal prices of a job shop with a single work station: a discrete time model
S.G. Johansen (Aarhus, Denmark) 129
Setting customer service levels: an overall cost-approach
P.A. Konijnendijk (Eindhoven, The Netherlands) 139
The economic lot scheduling problem: theory and practice
M.A. Narro Lopez (Monterrey, Mexico) and B.G. Kingsman (Lancaster, UK) 147
The use of the PROMETHEE method in the location choice of a production system
I. Pavić and Z. Babić (Split, Yugoslavia) 165
Optimal order quantity and pricing decisions in single-period inventory systems
L.H. Polatoğlu (Ankara, Turkey) 175
Complexity index as a base for decision making whether to introduce NC or conventional machines
S. Ramani and R. Venkatraman (Bombay, India) 187
Strategic aspects of flexible production technologies: theory and evidence
L.H. Röller and M.M. Tombak (Fontainebleau, France) 197
CIM networking: promise and problems
C.A. Snyder (Auburn, AL, USA) 205
Iterative determination and matching of part groups and machine cells: optimization and successive approximations
L.E. Stanfel (Tuscaloosa, AL, USA) 213
Computational procedures for stochastic multi-echelon production systems
G.J. van Houtum (Eindhoven, The Netherlands) and W.H.M. Zijm (Enschede, The Netherlands) 223
Controlling different flow rates in job-shop like production departments
H.P.G. van Ooijen (Eindhoven, The Netherlands) 239
Manufacturing practices: differences that matter
G. Vastag (Budapest, Hungary) and D.C. Whybark (Chapel Hill, NC, USA) 251
Multi-criteria models for capacity analysis and aggregate planning in manufacturing systems
C. Vercellis (Milan, Italy) 261
